Problem Overview

Why GES cannot currently see the customer

\$12B+

Annual revenue

Across 5 business lines

45M

Streaming subs

GES's identified audience

~50%

Transactions

Return no identifying info

Five Business Lines

GES operates across streaming, merchandise, studio tours, theatrical releases, and retail consumer products — each generating transactions, but through different systems.

The Data Gap

First-party channels (streaming, online store, tours) provide full customer data. Third-party channels (cinemas, retail partners) return zero customer identification — leaving GES blind to nearly half of its customer interactions.

Proposed Solution

Data Integration & Marketing Strategy

Three integrated pillars to unify GES customer data across every channel.

01

PARTNERSHIPS

Third-Party Data Agreements

Create partnership agreements with cinema chains and retailers to retrieve transaction-level customer data.

AMC · Regal · Cinemark · Walmart · Target · Amazon

02

ACQUISITION

GES Rewards Program

Convert 45M streaming subscribers and unknown customers into identified, trackable customer profiles.

45M Subs · Receipt Linking · Points System

03

INFRASTRUCTURE

Unified Data Pipeline

A modern cloud-native stack ingests all sources and builds actionable, privacy-compliant customer profiles.

Fivetran · Snowflake · dbt · Segment · LiveRamp

SECTION ONE

Exploratory Data Analysis & Problem Definition

Global Entertainment Studios · April 2026

2,500

Transactions

363

Unique Customers

9

Data Sources

5

Business Lines

\$210K

2024 Revenue

Customer Distribution by Business Line

120

Customers

Consumer Products

46

Customers

Studio Tours

KEY INSIGHT

Volume isn't a good representation of value.

~\$100,000

Total Revenue

Studio Tours

2.5x

Total Revenue

Studio Tours → Streaming

Lifetime Value: Single-Channel vs. Multi-Channel

Fig 3 — Multi-channel customers are worth 13.5x more

79.6%

Multi-channel customers
289 of 363

13.5x

Lifetime Value lift
\$714 vs \$53 avg

Average Customer Lifetime Value by Channel Depth

Fig 4 — Value accelerates with each additional channel engaged

Average Customer Lifetime Value by Channel Depth

# Channels	Customers	Avg LTV	Marginal Lift
1	74	\$52.78	— (Baseline)
2	48	\$139.06	+\$86.28
3	47	\$569.83	+\$430.77 ↑
4	93	\$761.06	+\$191.23
5 (All)	101	\$1,009.85	+\$248.79

+\$431

Biggest marginal jump

2 → 3 channels

KEY INSIGHT

80% of customers are multi-channel, but GES is unaware of which customers are ready to cross the threshold.

Data Quality & Completeness Assessment

Fig 5 & 6 — First-party: 100% email coverage. Third-party: 0%.

KEY INSIGHT

These two business lines have the highest volume in transaction count, but without identity resolution, GES does not know if these buyers are already multi-channel customers.

This makes it difficult to personalize & target campaigns.

EDA Problem Summary

Five interconnected challenges

01 Data Blindness

0% email coverage on third-party channels.
GES cannot identify its highest-volume customers in Consumer Products or Theatrical.

02 Untapped Multi-Channel Value

Multi-channel customers are worth 13.5× more, but GES does not know which single-channel customers are ready to convert.

03 The 2→3 Channel Jump

A customer jumping from 2 to 3 channels adds \$431 in value, but without unified profiles, GES cannot identify who is at that tipping point.

04 Wasted Marketing Spend

Without identity resolution, GES may advertise streaming to existing subscribers or promote merchandise to customers who already buy through unlinked third-party channels.

05 Incomplete CLV Measurement

True customer lifetime value is systematically understated because third-party transactions cannot be linked to known customer profiles.

Going Merry's solution directly addresses all five barriers through identity resolution, a GES Rewards program, and ML-driven marketing activation.

SECTION TWO

Proposed Solution

Data integration, partnerships, and a rewards program

Data Acquisition Strategy

Third-party partnerships + GES Rewards program

Third-Party Data Partnerships

Cinema chains (AMC, Regal, Cinemark) & retailers (Amazon, Target, Walmart)

- Data Scope: Hashed loyalty IDs tied to transaction-level records
- Permitted Use: Identity resolution and analytics only. No resale or ad targeting
- Privacy & Compliance: Data exchanged via clean room environments
- Value Exchange: Co-marketing, revenue sharing, and content promotions
- Data security: Tokenized storage, defined retention periods, breach protocols

GES Rewards Program

Convert 45M streaming subs + unknown buyers into identified profiles

- Enrollment: 45M streaming subscribers invited to link accounts via web portal
- Points System: Calibrated to fill data gaps. Cinema receipts earn the most, retail uploads second
- Rewards: store discounts, early content access, priority studio tour booking
- Data Flow: Every earned point logs a profile event into Segment

Privacy, Compliance & Data Security

Three barriers, one integrated solution

01

Barrier 01

Inconsistent Identifiers Across Systems

- Streaming, theatrical, and retail data cannot be joined today. No shared identifier exists across platforms
- Results in double counting, missed cross channel behavior, and unreliable customer segments
- Solved by deterministic matching in Phase 1 and LiveRamp probabilistic matching in Phase 3

02

Barrier 02

Privacy Regulations (GDPR & CCPA/CPRA)

- GDPR requires a clear legal basis and specific purpose before processing any customer data for profiling
- CCPA/CPRA gives consumers strong opt-out and deletion rights . "Sharing" is defined broadly to include cross-context behavioral data
- All data subject requests access, deletion, and opt-out — must be honored across every system in the unified pipeline

03

Barrier 03

Absence of Data-Sharing Agreements

- Privacy laws require formal agreements defining permitted use, security standards, and retention limits before data can be shared
- Without agreements, cinema and retail transaction data cannot legally flow into GES systems regardless
- Our five clause partnership framework and Phase 1 CMP deployment directly satisfy these legal requirements

Recommended Technology Stack

GES Data Integration Architecture

Step 1 — Data Sources

- We start by collecting data from first-party sources like streaming platforms, online stores, and studio tours.
- The GES Rewards program helps capture third-party data from cinema chains and retail partners.

Steps 2 & 3 — Ingestion and Storage / Transformation

- Once collected, we use Fivetran to automatically transfer data into a central platform — Snowflake, our data warehouse.
- With data stored in Snowflake, dbt (data build tool) cleans, transforms, and organizes raw data into standardized tables, improving reporting accuracy and saving time.

Step 4 — Unification

- Using the organized datasets, Segment labels and tracks customers across channels and builds unified profiles.
- LiveRamp then matches identities created in Segment across systems so profiles represent the same customer.
- OneTrust manages customer consent and ensures data usage complies with privacy regulations.

Step 5 — Activation

- Finally, we activate unified data across systems through Power BI, customer segmentation, personalized marketing, and predictive analytics.
- This allows GES to make faster, data-driven decisions across all channels.

3-Year Cost Summary

Itemized investment across the 18-month implementation

Cost Category	Year 1	Year 2	Year 3
Fivetran (ETL)	\$264,000	\$264,000	\$264,000
Snowflake (Warehouse)	\$150,000	\$175,000	\$200,000
Segment (CDP)	\$150,000	\$150,000	\$150,000
LiveRamp (Identity Resolution)	\$100,000	\$225,000	\$225,000
Power BI Licensing (~20 users)	\$18,000	\$18,000	\$18,000
OneTrust (Consent Mgmt)	\$75,000	\$75,000	\$75,000
Implementation & Integration	\$200,000	—	—
GES Rewards Program Dev	\$150,000	\$50,000	\$50,000
Consulting & Advisory Fees	\$350,000	\$200,000	\$100,000
Training & Change Management	\$50,000	\$25,000	—
Contingency (15%)	\$225,450	\$177,300	\$162,300
TOTAL INVESTMENT	~\$1,732,450	~\$1,359,300	~\$1,244,300

3-Year Total: ~\$4.34M investment · **Projected 3-year net value:** ~\$142.9M · **Breakeven:** Phase 2 (months 3–6)

Implementation Roadmap

18-month phased rollout

PHASE 01

Foundation & Quick Wins

Months 1–3

- Deploy Consent Management Platform and complete GDPR/CCPA compliance audit
- Stand up Segment and Snowflake as the core data infrastructure
- Unify existing 1st-party profiles via deterministic matching

PHASE 02

Integration & Partnerships

Months 4–9

- Automate data pipeline: Fivetran → Snowflake → dbt → Segment
- Launch GES Rewards to 45M subscribers and begin cinema partnership negotiations
- Build first ML models for CLV prediction and churn risk

PHASE 03

Scale & Optimize

Months 10–18

- Deploy LiveRamp for probabilistic matching on remaining unidentified customers
- Connect Target, Walmart, and Amazon via retail clean rooms
- Activate Power BI dashboards and first cross-channel marketing campaigns

Phase 1: Foundation & Quick Wins

Months 1-3 · Legal, Identity, and Infrastructure Groundwork

Workstream 1

Consent Management Key Activities: Deploy CMP across streaming, retail touchpoints, and tour check-in systems

Employees Needed: Privacy/Legal Analyst

Milestone: CMP live on all 1st-party channels

Workstream 2

Compliance Audit Key Activities: GDPR/CCPA gap analysis and draft data processing agreements for partnerships

Employees Needed: Privacy/Legal Analyst

Milestone: Compliance roadmap finalized

Workstream 3

CDP & Cloud Infrastructure Key Activities:

Stand up Segment for customer profiles and provision Snowflake data warehouse

Employees Needed: Cloud/Data Architect

Milestone: Segment and Snowflake environments live

Workstream 4

Deterministic Matching Key Activities: Link existing records via email and loyalty IDs across all 1st-party sources

Employees Needed: Data Engineer

Milestone: 1st-party profiles unified

Phase 2: Integration & Partnerships

Months 4–9 · Grow First-Party Data and Begin Third-Party Partnerships

Workstream 1

Data Pipeline Key Activities: Deploy Fivetran to automate data ingestion into Snowflake. Configure dbt models to transform raw data into clean analysis ready tables

Employees Needed: Data Engineers

Milestone: Automate pipeline and dbt models are live

Workstream 3

GES Rewards Program Key Activities: Build web portal, invite 45M streaming subscribers, and implement QR receipt scanning

Employees Needed: Product Manager + Dev Team

Milestone: Rewards program launched

Workstream 2

Cinema Partnerships Key Activities: Negotiate data-sharing agreements with AMC Stubs, Regal Crown, and Cinemark

Employees Needed: Partnerships Lead

Milestone: First cinema partnership signed

Workstream 4

Profile Activation & ML Key Activities: Connect all data feeds into Segment to build unified profiles; develop CLV prediction and churn risk models

Employees Needed: Data Engineer + Data Scientist **Milestone:** Unified profiles and first ML models in production

Phase 3: Scale & Optimize

Months 10–18 · Complete Integration, Probabilistic Matching, and Full Activation

Workstream 1

LiveRamp Integration Key Activities: Deploy probabilistic matching using device graphs and behavioral signals to identify remaining unknown customers

Employees Needed: Data Engineer + Vendor

Milestone: Probabilistic matching live

Workstream 2

Retail Clean Rooms Key Activities: Execute data-sharing agreements with Target, Walmart, and Amazon via clean room environments

Employees Needed: Partnerships Lead + Legal

Milestone: All major retailers connected

Workstream 3

ML & Analytics Key Activities: Deploy full reporting suite, ML models powered by clean Phase 1–2 data, and self-service Power BI dashboards for executives and marketing

Employees Needed: Data Scientist + BI Developer
Milestone: Full model suite and dashboards live

Workstream 4

Marketing Activation Key Activities: Launch personalized cross-channel campaigns using unified profiles; implement A/B testing framework and continuous KPI monitoring

Employees Needed: Marketing Analyst + Full Analytics Team

Milestone: First cross-channel campaign live and optimization flywheel active

Revenue Impact by Driver

Grounded in EDA findings, scaled to GES's 45M subscriber base

Revenue Driver	How We Calculated It	Year 1	Year 2	Year 3
Single→Multi Conversion	9.18M single-ch × 0.6% conv × \$86 lift	\$5.0M	\$15.0M	\$25.0M
2→3 Channel Acceleration	5.94M 2-ch × 0.08% conv × \$431 lift	\$2.0M	\$8.0M	\$15.0M
Streaming Churn Reduction	45M subs × 0.03pp saved × \$83.55/sub	\$1.0M	\$5.0M	\$10.0M
Marketing Efficiency	15–25% wasted spend eliminated	\$1.0M	\$5.0M	\$10.0M
Merch Cross-Sell	2–3× attach rate from cross-channel recs	\$0.5M	\$3.0M	\$8.0M
New Acquisition	Lookalike models reduce CAC 20–30%	\$0.5M	\$4.0M	\$12.0M
TOTAL REVENUE UPLIFT		\$10.0M	\$40.0M	\$80.0M

Year 1 needs fewer than 60,000 customers out of 9M to add a second channel. Loyalty program invites to existing customers typically see 5–10% signup rates — we’re well within that range.

Conversion rates reflect expected behavior from Rewards incentives and targeted campaigns.

Business Impact & 3-Year ROI

Revenue uplift + cost savings vs. total investment

	Year 1	Year 2	Year 3	3-Yr Cumulative
Total Investment	\$1.73M	\$1.36M	\$1.24M	\$4.34M
Revenue Uplift	\$10.0M	\$40.0M	\$80.0M	\$130.0M
Cost Savings	\$1.70M	\$5.50M	\$10.0M	\$17.2M
Net Value	\$9.97M	\$44.1M	\$88.8M	\$142.9M

~\$143M

3-Year Net Value

3-6 mo

Breakeven Timing

3,293%

Year 3 ROI

Why These Projections Are Realistic

Every number is grounded in observed data or established industry benchmarks

~60K

customers needed in Yr 1

Realistic Adoption Rates

Loyalty program invites to existing customers typically see 5–10% signup rates. We need fewer than 60,000 out of 9M single-channel customers to convert in Year 1. The Rewards program directly incentivizes this with points and perks.

0.6%

of \$12.8B annual revenue

\$80M = 0.6% of Revenue

Even the full Year 3 projection of \$80M represents just 0.6% of GES's \$12.8B annual revenue. A data integration initiative adding less than 1% incremental growth is a proven, well-documented outcome.

\$4.34M

total 3-year investment

Minimal Downside Risk

The entire 3-year investment is \$4.34M — less than 0.04% of annual revenue. Even if projections come in 50% below target, GES still nets over \$69M and the investment pays for itself within Year 1.

SECTION THREE

Power BI Dashboards

Real-time visibility across customer analytics, revenue, and data integration health

Dashboard 01: Executive Overview

Proposed Consulting Team

Five roles, one integrated delivery

Massimo Arellano

Business Impact

Financial modeling, revenue forecasting, and ROI frameworks. Owns the marginal impact analysis and business case quantifying projected returns.

Haley Hopkins

Lead Data Analyst

EDA, customer segmentation, and LTV modeling. Translates statistical findings into clear, actionable insights.

Harrison Thomas

Compliance & Security

Privacy, compliance, and data security. Designed the identity resolution pipeline and five-clause partnership framework.

Angel Jimenez

Strategy & Partnerships

Go-to-market planning and strategic alliances. Translates complex challenges into actionable roadmaps.

Oliver Lin

Infrastructure & Technology

Data infrastructure: Snowflake, Fivetran, dbt, Segment, LiveRamp. Former insight analyst at Riot Games.

Thank you

Appendix C: References & Sources

Dataset

GES Customer Interaction Dataset — 2,500 transactions across 363 customer profiles and 9 data sources (3 first-party, 6 third-party).

Industry Benchmarks

Vendor	Reference	Source
Snowflake	Published pricing	snowflake.com
Fivetran	Standard tier	fivetran.com
Segment	Business tier	segment.com
LiveRamp	Enterprise estimates	liveramp.com
OneTrust	Pricing	onetrust.com
Power BI Pro	Microsoft pricing	microsoft.com

Appendix F: Dashboards

KPI / Visual	Description	Visual Type
Total Identified Customers	Unique customers with unified profiles across all channels;	KPI Card
Avg Customer Lifetime Value	Mean CLV across all segments;	KPI Card with delta
Multi-Channel Engagement Rate	% of customers active in 2+ business lines	KPI Card with delta
Annual Revenue	Total revenue with YoY comparison	KPI Card with delta
Rewards Members	GES Rewards program enrollment	KPI Card with delta
Revenue by Business Line	Revenue breakdown: Studio Tours, Streaming, Online Store, Consumer Products, Theatrical	Horizontal bar chart
Monthly Revenue Trend	Monthly revenue with area fill showing upward trajectory post-integration	Line / area chart
CLV by Channel Depth	Average CLV by number of business lines engaged (1-5 channels) with customer counts	Horizontal bar chart
Customer Acquisition Funnel	Total Base → Identified → Rewards Enrolled → Multi-Channel → High-Value (3+ ch)	Horizontal bar / funnel

KPI / Visual	Description	Visual Type
Single→Multi Conversion Rate	% of single-channel customers who added a 2nd channel this quarter	KPI Card with delta
2→3 Channel Conversion	Conversion rate for the highest-value transition	KPI Card with delta
Identity Match Rate	% of 3rd-party transactions successfully linked to known profiles via LiveRamp + Rewards	KPI Card with delta
Rewards Receipt Links	Total cinema and retail receipts linked through the GES Rewards program	KPI Card with delta
Marginal Revenue Lift	Revenue lift per channel transition	Horizontal bar chart
Cross-Sell by Journey Path	Top customer journey sequences with conversion rates and avg revenue per path	Data table
Channel Overlap Matrix	Millions of shared customers across each pair of business lines (5×5 matrix)	Matrix / heatmap table

Appendix F: Dashboards pt 2

KPI / Visual	Description	Visual Type
Incremental Revenue (YTD)	Total revenue attributed to data integration	KPI Card with delta
Revenue per Identified User	identified vs unidentified	KPI Card with comparison
Incremental LTV (Multi-Ch)	Additional lifetime value above single-channel baseline	KPI Card
Marketing ROI	ROI on unified targeting campaigns	KPI Card with delta
Cost Savings (YTD)	Marketing waste reduction + lower CAC	KPI Card
Incremental Revenue by Driver	Breakdown: Channel Conversion, 2→3 Acceleration, Churn Reduction, ROAS, Cross-Sell, Acquisition	Horizontal bar chart
3-Year ROI Projection	Investment vs. Revenue Uplift vs. Cost Savings vs. Net Value vs. ROI % by year	Data table
Identified vs. Unidentified RPU	Side-by-side comparison of revenue per user with customer counts	Comparison card
Marginal LTV — ML Model Output	Channel transition, marginal lift, 95% CI, customers converted, revenue	Data table

KPI / Visual	Description	Visual Type
Campaign ROAS	Return on ad spend by campaign type	KPI Card with delta
Customer Acquisition Cost	Blended CAC across channels; target	KPI Card with delta
Streaming Churn Rate	Monthly churn	KPI Card with delta
Conversion Rate (CVR)	Cross-channel targeted CVR	KPI Card with delta
Marketing Waste	% of spend on redundant/irrelevant impressions	KPI Card with delta
Campaign Performance Table	Spend, Revenue, ROAS, CVR, and CAC by campaign type with pre-integration baseline	Data table
A/B Test Results	Experiment name, control vs. treatment, lift %, p-value, significance status	Data table with badges
Marketing Attribution	Revenue attributed to each touchpoint: Streaming Recs, Email, Rewards, Social, Lookalikes, Tours	Vertical bar chart

Appendix F: Dashboards pt 3

KPI / Visual	Description	Visual Type
Overall Email Coverage	% of customers with email	KPI Card with delta
3P Identity Match Rate	% of 3rd-party transactions linked to known profiles	KPI Card with delta
Data Completeness Score	Average profile field coverage	KPI Card with delta
Pipeline Uptime	Combined uptime for Fivetran + Snowflake + dbt	KPI Card
Email Coverage Before vs. After	Before and after integration comparison by data source with method used	Data table
Rewards Program Funnel	Invites → Enrolled → Linked Receipt → Multi-Channel → High-Value conversion	Horizontal bar / funnel
Pipeline Health	Component status, sources connected, last sync, refresh rate, error rate for all 8 systems	Status table

Appendix G: Revenue Projection Assumptions

How each driver was calculated from EDA findings

Driver	Base Population	Conversion Rate	Lift / Value	Source
Single→Multi	9.18M (45M × 20.4%)	Yr1: 0.6% Yr2: 1.9% Yr3: 3.2%	\$86.28 per customer/yr	EDA: avg LTV at 2ch (\$139) minus 1ch (\$53)
2→3 Channel	5.94M (45M × 13.2%)	Yr1: 0.08% Yr2: 0.3% Yr3: 0.6%	\$430.77 per customer/yr	EDA: avg LTV at 3ch (\$570) minus 2ch (\$139)
Churn Reduction	45M streaming subscribers	Yr1: 0.03pp Yr2: 0.13pp Yr3: 0.27pp	\$83.55 avg streaming rev	EDA: avg revenue per streaming customer
Mktg / Cross-Sell / Acquisition	GES marketing budget + acq volume	Industry benchmarks	15–25% waste cut; 20–30% CAC drop	Published benchmarks from CDP implementations

Note on Methodology

Revenue projections are calculated by multiplying the observed marginal LTV lift per channel transition by the estimated customer base at each segment level, applying realistic adoption rates based on the GES Rewards program incentive structure. We recommend validating with controlled A/B tests during Phase 2 before scaling to full activation.
